Executive Summary

Highly certified Computer Networks graduate with hands-on expertise in high-availability enterprise infrastructure, multi-vendor migrations, and proactive network telemetry. Backed by CCNP Enterprise and Cisco CyberOps Associate certifications, offering a robust foundation in advanced routing, switching, and security operations. Proven track record of executing large-scale physical deployments and safeguarding critical network uptime in demanding, fast-paced environments.

Certifications

- | | |
|--|-----------------|
| 1. CCNP Enterprise: Core Networking | 8 April 2026 |
| 2. CCNP Enterprise: Advanced Routing | 2 October 2025 |
| 3. Cisco Certified CyberOps Associate | 6 April 2026 |
| 4. CCNA: Enterprise Networking, Security, and Automation | 18 March 2026 |
| 5. CCNA: Switching, Routing, and Wireless Essential | 7 February 2025 |

Work Experience

Impressive Communication Sdn. Bhd.

September 2023 – February 2024

Mobile Application Developer Intern

- Designed and optimized UI/UX interfaces utilizing Figma, while actively debugging and testing mobile application features to guarantee seamless cross-platform performance.
 - Supported end-to-end system integration and executed rigorous troubleshooting protocols during critical application testing phases.
- Produced comprehensive project documentation and leveraged modern mobile development tools within an Agile team environment.

Orien Net Solutions Sdn. Bhd.

March 2026 – July 2026

Network Engineer Intern

- Executed seamless network gateway migrations for critical healthcare infrastructure at HCM, transitioning legacy VLANs to modernized architectures with updated subnets and default gateways utilizing **H3C AD-Campus** solutions.
- Configured and provisioned 63 SNMP mini cards for Uninterruptible Power Supply (UPS) systems, establishing centralized, real-time health and power monitoring via **ViewPowerPro** to proactively ensure continuous infrastructure uptime.
- Conducted comprehensive preventive maintenance on enterprise switches at Wisma Felcra, performing physical hardware optimization and CLI-based system diagnostics (temperature checks, log-buffer analysis, and configuration audits), culminating in detailed asset condition documentation.
- Managed Layer 1 physical deployments, including enterprise "rack-and-stack" switch installations, meticulous cable management, and hardware mounting to deliver clean, optimized, and maintainable data closet infrastructure across 12 floors.

Projects

Smart Shuttle Bus System with Real-Time Bus Tracker in UiTM Shah Alam

- Developed a real-time transit mobile application using **React Native Expo-Go**, delivering a user-friendly interface for students to accurately track campus bus locations and statuses.
- Executed custom IoT hardware integration via **PlatformIO**, programming a Neo-6M GPS for telemetry, Infrared sensors for passenger counting analytics, Ultrasonic sensors for precise arrival detection, and PIR sensors for energy-efficient fan automation.

Enterprise Network Migration

- Executed seamless gateway migrations for critical healthcare infrastructure, successfully transitioning legacy VLANs to a modernized architecture with updated subnets and default gateways.
- Deployed **H3C AD-Campus** solutions to optimize network routing and switching, ensuring stable, high-performance connectivity across the hospital's operational environment.

Infrastructure Health Monitoring Deployment

- Engineered and deployed a centralized health-monitoring ecosystem for critical facility power infrastructure by configuring 63 SNMP mini cards across enterprise Uninterruptible Power Supply (UPS) units.
- Established real-time telemetry and automated alerting via **ViewPowerPro**, enabling proactive fault detection and guaranteeing maximum uptime for sensitive network hardware.

Education

2021 – 2024: UiTM Melaka Kampus Jasin

- Diploma in Computer Science
- CGPA: 3.27

2024 – 2026: UiTM Shah Alam

- Bachelor of Computer Science (Hons.) Computer Networks
- CGPA: 3.35

Skills

- **Networking Vendors & OS:** Cisco IOS, H3C Comware
- **Routing & Switching:** OSPF, EIGRP, BGP, VLANs, Inter-VLAN Routing, IRF, Network Security
- **Infrastructure & Operations:** Hardware Deployment, Site Migration, Physical Cabling, Network Troubleshooting, Fault Diagnosis, Technical Documentation
- **Software & App Development:** React Native, Expo-Go, Figma, Flutter, Android Studio
- **IoT & Embedded Systems:** PlatformIO, Sensor Integration (Neo-6M GPS, IR, PIR, Ultrasonic), Hardware-Software Bridging
